Boston University Admission Essay

October 26, 2019

Prompt 1: What about being a student at Boston University most excites you?

In my pursuit to study economics, I have chosen Boston University. There are several reasons for BU as my perfect place for achieving a degree. First, the University presents a great academic opportunity. I am looking forward to learning from top professors in economics and finance there. I also look forward to exchanging my academic experience at conferences held on campus. I would like to start an academic career after college, so I was glad to discover extensive research and development opportunities offered by Boston University.

Diversity is another thing I like about BU. First, it will be a wonderful opportunity for me to learn from experts with international experience. And of course, it will be very exciting to meet students from all over the world on campus. I am fond of foreign cultures and I hope to travel abroad more often as I become a university student.

Luckily, Boston University provides job opportunities on campus. Like many other students, I expect to combine work and studies. I also like sports. I am very good at swimming and I would be glad to join the BU swimming team. Perhaps, taking a job and sports after classes sounds too ambitious. But, I am not afraid of this challenge. I am a vigorous and energetic person, so I expect to manage all my activities well.

All in all, becoming a freshman at Boston University will be a great chance for me to live a fulfilling life and pursue my academic ambition.

Prompt 2: Additional information about you as a future BU student:

I spent my high school years in Brookline, where me and my family lives. Becoming a scholar is my childhood dream as both of my parents finished graduate school in their college days. I am good at STEMs but economics attracts me most of all. It would be a great opportunity for me to keep going with my studies at Boston University.

I am a well-organized person and I always do some sports in my free time. As I already mentioned, swimming is my favorite activity. At the Newton Annual High School Swimming Championship, I scored second last year. Besides sports, I spend some of my free time with friends. Many of them have entered colleges by now, so I look forward to meeting new interesting people on the BU campus.

Traveling is another old ambition of mine, but I did not succeed at it yet. I found myself constantly occupied with studies and my free time was filled with extracurriculars. As I get a part-time job on campus, I expect to see more of the world. There are many fantastic places in the US I would like to visit. Also, Asia looks like a wonderful destination to me.

Becoming a Boston University student will be an academic challenge and a new responsibility for me. However, I am not afraid of taking on new subjects and moving to live on campus. Becoming a freshman looks so exciting! Not only will studying academic subjects shape my personality, I also look forward to connecting and networking with many new people on campus.

We can always help you write an admission essay for the university of your dream.
